

You are invited to attend

The Lighthouse Platform for Photonic Applications in New Zealand

*as part of the Dodd-Walls Centre of Research Excellence
and supported by Callaghan Innovation.*

*Learn more about how photonics and quantum technology can
grow your Agri-business and how university researchers can
actively support your R&D. Examples of our research projects include:*

- *Sex selection for AI in cattle*
- *Point-of-cow diagnostics*
- *Ammonia detection in animal farms*
- *Non-invasive testing of wood properties*
- *Non-invasive testing of fruit ripeness*
- *Detecting bacterial contamination of meat*

Find out more by joining our Linked In group.

*12 May 2016, 5.30-7.30PM
Rydges Latimer Christchurch
30 Latimer Square, Christchurch*

*Please RSVP by 5 May 2016 to:
info@lighthouseplatform.org.nz
www.lighthouseplatform.org.nz*
